

Orbis and Tornado Mk II, and Vortex Torque Cell Check Calibration Rig

Checks gauge torque cells

Checks Vortex torque sensors

Mass Kit

Check rig components

Description

The check calibration rig is a bench-top unit which allows the on-site verification of the calibration status of Orbis MkII, Tornado MkII testers, and static torque sensors rated from 1.5 N.m to 10 N.m. Using dead-weight masses, the kit allows you to quickly decide whether or not adjustment, recalibration or repair is required. The kit does not replace the need for regular professional calibration.
